

# **What is the future of our community?**

A small group of concerned individuals have put their hands up, organised and got support from Far North District Council to create a Long Term Community Plan for the Whangaroa area.

The plan is going to take some time to complete to ensure the kaupapa is correct and is what the community wants.

This plan looks at the areas of Economy, Social Impact, Cultural Impact and the Environmental Impact on both our natural resources and our infrastructure.

As we go further down the track of creating a living document that encompasses the ideals of Kaitiakitanga and Kotahitanga, the communities that make up our rohe will be involved in the consultation to ensure that we have a singular vision that can be achieved.

We ask that the community joins with us in the development of this plan. Please leave your comments and suggestions here, or visit our community feedback page on the website:
